

# Comparison of Printing:

**Optimization saved:  
11 hours 4 minutes (-46 % printing time)**

Optimization via Slicelog additionally guaranteed the strength of the part, so it could **withstand the required load of force 500 N.**

Optimization via Slicelog additionally guaranteed the strength of the part, enabling reaching **safety factor of 3.**

**Original part – Bambu Studio 0.2 profile strength, without guaranteed strength**

| Parameter     | Original   | Optimized   | Savings           |
|---------------|------------|-------------|-------------------|
| Printing time | 1d 0h 3min | 12 h 59 min | -1h 20min (-38 %) |
| Material      | 201 g      | 97 g        | -104 g (-52 %)    |
